High Points

- Next level AI delivered to the market.
- Exceptional revenue growth.
- Fully subscribed capital round.
- Efficient utilization of capital and resources.
- Key Metrics on point.

Black Pearl Group creates high-value, low-cost, data-driven sales and marketing solutions to the US SME market.

Our ability to ingest, process and create value from data is because BPG has been meticulously collecting data for over a decade and has invested over 25m in creating its proprietary data platform.

Listing on the NZX has given us greater access to new, high-value data sets which we have leveraged to create an exciting new service Pearl Diver.

Markets & Customers

US market and those selling to the US market

Both B2B and B2C businesses

Solopreneur / Small business

- Require a website as a storefront but generate low value from it
- Want very simple ways to increase lead volume for outreach

Medium businesses

- Struggling with cost and return from digital advertising
- Have marketing and sales teams that need lead flow

Partners

- Provide marketing or lead generation services
- Customers demanding greater visibility of return on investments

Appendix

Definitions of Key SaaS Terms & Metrics:

Recurring revenue: Recurring revenue is revenue that is expected to repeat each period into the future. For Blackpearl, this is revenue directly linked to the number of customers we have.

MRR: Monthly recurring revenue is the total recurring revenue for the last calendar month of the reporting period.

ARR: Annual recurring revenue is the MRR, multiplied by 12. **ARPU (monthly):** Average revenue per user (monthly) is the total recurring revenue for the month, divided by the total customers processing payroll that month.

AVG MRR / Customer: Average monthly recurring revenue per customer.

Gross margin: The gross margin, when discussed as a SaaS term, is the recurring revenue of the business, less the cost to serve customers. This is often then expressed as a percentage, where the gross margin is divided by the recurring revenue.

Churn: Churn is expressed as a percentage calculated as the net reduction of customers in a calendar month divided by the total customers at the start of that month.

LTV: Lifetime value is the estimated value of a customer over its lifetime. This is calculated by taking the ARPU multiplied by the gross margin %, then divided by the churn %.

Note - the terms and metrics above are Non-Generally Accepted Accounting Principles (non-GAAP) measures and should not be viewed in isolation, not considered substitutes for measures reported in accordance with New Zealand Equivalents to International Financial Reporting Standards (NZ IFRS).
